DETAILED ACTION

1. This Supplemental Restriction Requirement replaces the previous Restriction Requirement, mailed 02/03/2006. This Supplemental Restriction Requirement includes correction of claim numbers in Groups III - VII, which were erroneously listed in the previous Office Action. The Examiner thanks Applicant for drawing attention to the error in a telephone interview on 02/10/2006.

2. Applicant's Preliminary Amendment, filed 12/12/2005, is acknowledged.

Claim 1 – 8 has been canceled.

Claims 9 – 54 have been added.

Claims 9 – 54 are pending.

3. For restriction purposes the following is noted:

The instant claims contain recitations of multiple distinct antibodies. These antibodies are patentably distinct because their structures, physicochemical properties and/or mode of action are different, and they do not share a common structure that is disclosed to be essential for common utility. Therefore, the restriction has been set forth for each as separate groups, irrespective of the format of the claims.

Applicant is invited to clarify the relationship between Mab number (as e.g. in claim 14) and binding specificity.

Restriction Requirement

4. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 9 – 54, drawn to an isolated antibody Mab1 or fragment thereof, and to compositions comprising said antibody or fragment, classified in Class 530, subclass 387.1, and Class 424, subclass 130.1.

II. Claims 9 – 54, drawn to an isolated antibody Mab21 or fragment thereof, and to compositions comprising said antibody or fragment, classified in Class 530, subclass 387.1, and Class 424, subclass 130.1.

III. Claims 9 – 54, drawn to an isolated antibody Mab32 or fragment thereof, and to compositions comprising said antibody or fragment, classified in Class 530, subclass 387.1, and Class 424, subclass 130.1.

IV. Claims 9 – 54, drawn to an isolated antibody Mab42 or fragment thereof, and to compositions comprising said antibody or fragment, classified in Class 530, subclass 387.1, and Class 424, subclass 130.1.

V. Claims 9 – 54, drawn to an isolated antibody Mab47 or fragment thereof, and to compositions comprising said antibody or fragment, classified in Class 530, subclass 387.1, and Class 424, subclass 130.1.

VI. Claims 9 – 54, drawn to an isolated antibody Mab53 or fragment thereof, and to compositions comprising said antibody or fragment, classified in Class 530, subclass 387.1, and Class 424, subclass 130.1.

Art Unit: 1644

VII. Claims 9 – 54, drawn to an isolated antibody Mab54 or fragment thereof, and to compositions comprising said antibody or fragment, classified in Class 530, subclass 387.1, and Class 424, subclass 130.1.

5. Groups I – VII are different products. The products are patentably distinct because their structures, physicochemical properties and/or mode of action are different, and they do not share a common structure that is disclosed to be essential for common utility. Furthermore, they require non-coextensive searches in the scientific literature. Therefore, each product is patentably distinct, and searching of these Inventions would impose an undue burden.

6. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1644

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ILIA OUSPENSKI whose telephone number is 571-272-2920. The examiner can normally be reached on Monday-Friday 9 - 5.
